Dear valued partners,

The United Nations Sustainable Development Goals are classified in various ways. The most widely used classification in sustainability reporting is based on the principle of grouping global targets according to their economic, environmental and social impacts. As Gaia Sourcing, we have analyzed and classified the economic, social and environmental interactions of a total of 15 projects that we have implemented since 2015.

According to these projects, it has been determined that Gaia Sourcing implements activities that support economic development, significantly increase social interaction and promote environmental sustainability.

## PROTECTING THE PLANET

## BUILDING PEACE AND DEVELOPMENT IN PARTNERSHIP

## PROMOTING HUMAN DEVELOPMENT

## SPREADING PROSPERITY

AS GAIA SOURCING,  
we evaluated our  
impacts on  
sustainable  
development goals  
with our projects.

In institutional harmonization studies according to objectives, analyzes can be made according to one or more classifications, depending on the primary purpose of the study.

Accordingly, the 15 projects implemented by Gaia Sourcing are distributed among the priority areas as follows; 8 projects Protecting the Planet, 7 projects Partnership and Peace, 3 projects Promoting Human Development and 13 projects Spreading Prosperity.

# THE GLOBAL GOALS

For Sustainable Development

From a different perspective, PwC groups global goals as human, prosperity, planetary and peace partnerships.

# THE GLOBAL GOALS

For Sustainable Development

A total of 15 projects or practices that Gaia Sourcing carries out with all its employees in the field of sustainability are related to one or more goals.

While Gaia Sourcing has focused on projects that will contribute to the goals of "Decent Work and Economic Growth", "Reduced Inequalities", "Responsible Consumption and Production" and "Partnerships for The Goals", it has also implemented projects that support other goals.
